CC YES! FOR COLORADO
Almost 30 years after narrowly enacting the most restrictive government spending limits in the country, Prop CC asks Colorado voters to remove the arbitrary revenue limits which have severely restricted our ability to invest in our students, our roads and bridges, and to address the needs of our fast-growing state.

This fall, we have an opportunity to begin to repair the damage the state’s antiquated budget formula has done not just to our roads and bridges, but to our K-12 and higher education systems as well. And we can do it without raising taxes.

Prop CC also includes unprecedented transparency, requiring annual, independent audits to show the public how the money was spent.
PROP CC DELIVERS $300+ MILLION PER YEAR SPLIT EQUALLY BETWEEN

$103 MILLION K-12 EDUCATION
$103 MILLION ROADS & BRIDGES
$103 MILLION HIGHER EDUCATION
IF PASSED, THE MONEY — $310M IN FY20 AND $342M IN FY21 — WOULD BE DIVIDED EQUALLY BETWEEN:

ROADS, BRIDGES AND TRANSIT
2020-21: $103m
2021-22: $114m

K-12 PUBLIC SCHOOLS
2020-21: $103m
2021-22: $114m

HIGHER EDUCATION
2020-21: $103
2021-22: $114
Prop CC continues momentum to invest more in public services that has been building at the local level for years. The overwhelming majority of local governments and school districts have asked and received permission from voters to keep and spend money collected above current limits. That includes:

- 96% of school districts
- 84% of counties
- 80% of municipalities

* 174 of 178 districts / 51 of 64 counties / 230 of 274 cities and towns
• Though Colorado regularly ranks among the top economies in the country (we are currently ranked No. 1 by US News & World Report), our investment in our K-12 public schools consistently ranks near the bottom.

• Colorado spent roughly $2,510 less per student in 2016 than the national average, ranking below some of the poorest states in the nation, including: Kentucky, Louisiana, New Mexico, West Virginia, and Wyoming.

• As of this year, 111 of the 178 school districts in Colorado operate on four-day weeks, which leads the nation and is up from just 39 in 2000.

• In 2000, the state funded two-thirds of a student’s cost of higher education, while the student was responsible for one-third. By 2016, that ratio had flipped and the state now funds only one-third.
The state's current backlog of transportation-infrastructure needs is estimated at $9 billion.

Nearly 25% of public roads across Colorado are rated as being in “poor” condition and almost 500 bridges have been deemed “structurally deficient.”

In metro Denver, 40 percent of roads are deemed to be in “poor” condition.

Driving on roads in need of repair in Colorado costs each driver $580 per year.

The average motorist will lose $2,306 per year to car repairs and to time lost in congestion.
GOOD FOR OUR ECONOMY

• Thousands of Colorado’s business, public sector, and academic leaders agree that an arbitrary cap preventing the state from keeping the revenue it already collects is not sound fiscal policy.

• Allowing the state to keep and spend revenue above current limits will stimulate more sustainable growth in our economy and help provide the critical services that enable all Coloradans to get ahead.

• The revenue cap stifles business development across the state and hinders the economic mobility of all Coloradans — especially rural communities that haven’t experienced the same economic success as the Front Range.
ISN’T THIS JUST A TAX INCREASE?
No. See for yourself in the measure’s straightforward ballot language: “Without raising taxes and to better fund public schools, higher education, and roads, bridges, and transit, within a balanced budget, may the state keep and spend all the revenue it annually collects after June 30, 2019, but is not currently allowed to keep and spend under Colorado law, with an annual independent audit to show how the retained revenues are spent?”

IS THIS JUST ANOTHER BLANK CHECK TO FUND GOVERNMENT GROWTH?
No. The money must be spent on three specified areas, which will create construction jobs and help students and teachers in the classroom. This isn’t funding government growth; it’s funding public services that help our state economy and the people who live here.

IS THIS JUST AN EFFORT TO UNDO THE TAXPAYER’S BILL OF RIGHTS (TABOR)?
No! Prop CC does what TABOR requires: asks voters to keep revenue beyond TABOR’s arbitrary limits. Voters will still be asked to approve future tax increases. We are not undoing TABOR.

FREQUENTLY ASKED QUESTIONS
IS PROP CC THE CURE FOR COLORADO’S BUDGET WOES?
No, but it’s a great step forward — and a step that we’d be taking without raising taxes.

AND HOW DO WE KNOW IT WON’T BE WASTED?
Prop CC includes unprecedented transparency, requiring annual, independent audit to show the public how the money was spent.

WILL NEW MONEY RAISED FOR TRANSPORTATION HAVE ANY IMPACT AT THE LOCAL LEVEL?
Absolutely. Prop CC mandates that 40% of the new money go to cities and counties while 60% would go to the state highway fund.
